

Custom BIRDMAN Model

```
data {  
  // Load data from Python  
  ...  
}  
  
parameters {  
  // Define parameters to fit  
  ...  
}  
  
model {  
  // Assign priors  
  beta ~ normal(0, 2);  
  phi ~ lognormal(0, 1);  
  
  // Likelihood  
  eta = beta*X + log(depth);  
  counts ~ neg_bin(eta, 1/phi);  
}
```

Differentials
